## 系統概述

本三角形辨識系統主要提供使用者兩種功能,一為測試三角形的三邊是否在 准許的範圍內(1<=x<=200),若是使用者給定三邊長皆在合法範圍內,則會 再進一步辨識此三角形為何種三角形(正三角形、等腰三角形、不等三角 形、非三角形)

## 系統例外處理 (防呆機制)

1. 若是在詢問使用者要不要離開時,輸入錯誤指令,則會再詢問使用者一次。

```
Would you like to leave?(y/n)
b
Would you like to leave?(y/n)
a
Would you like to leave?(y/n)
n
Please input the value of a:
```

2. 若是在詢問使用者三邊長的值時,輸入不符合 Integer 的格式資訊,則會 再詢問使用者一次。

```
Would you like to leave?(y/n)

n

Please input the value of a:
5.5

Invalid format for an integer. Please input the value again:
a

Invalid format for an integer. Please input the value again:
7

Please input the value of b:
```

## 系統功能

功能名稱:選擇指令

功能步驟:

Step 1. 螢幕顯示:

Would you like to leave?(y/n)

Step 2. 使用者輸入指令

Step 3. 依照不同指令顯示不同功能

功能書面:

```
Would you like to leave?(y/n)

y

Thank you! Bye!

Would you like to leave?(y/n)

n

Please input the value of a:
```

功能名稱:測試三角形

功能步驟:

Step 1. 螢幕顯示 (按順序):

```
Please input the value of a(b or c):
 Step 2. 使用者依順序輸入三個整數
 Step 3. 螢幕顯示:三角形類型
功能畫面:
Please input the value of a: Would you like to leave?(y/n)
                               Please input the value of a:
Please input the value of b:
                               Please input the value of b:
Please input the value of c:
                               Please input the value of c:
Scalene
                               Equilateral
                            Would you like to leave?(y/n)
Would you like to leave?(y/n)
Please input the value of a:
                            Please input the value of a:
Please input the value of b:
                            Please input the value of b:
Please input the value of c:
                            Please input the value of c:
Isosceles
                            NotATriangle
功能名稱:離開系統
功能步驟:
 Step 1. 螢幕顯示:
     Would you like to leave?(y/n)
 Step 2. 使用者輸入指令(y)
 Step 3. 依照不同指令顯示不同功能
功能畫面:
Would you like to leave?(y/n)
Thank you! Bye!
```
